Handling of intact batteries does not present a lead exposure. A lead health hazard is present if lead posts are melted or mechanically abraded.	
Health Hazards:	Acute - most will pass through body unabsorbed; at very high exposures, may cause lead intoxication with symptoms of nausea and abdominal cramps. Chronic - anemia, malaise, tremors, gastritis, liver changes.
California Proposition 65 Warning – Battery posts, terminals, and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm. Batteries also contain other chemicals known to the State of California to cause cancer. Wash hands after handling.	

SECTION IV: FIRST AID MEASURES	
Inhalation: Solid battery, no inhalation possible.	Skin Contact: Wash thoroughly with soap and water.
Eye Contact: Flush with water; get immediate medical attention.	
Ingestion: Induce vomiting, seek medical attention immediately.
